

Elevate Your Lifestyle with the VIDO

Compact Luxury. Panoramic Views. Effortless Accessibility.

The VIDO Series by Artisan Elevators represents a shift in home mobility. Designed to blend seamlessly into your existing home decor, the VIDO offers the accessibility you need without the heavy construction or space requirements of a traditional elevator.

Why Homeowners Choose the VIDO?

1. Affordability

Custom look without the custom price.

2. Preserves Your Living Space

Traditional elevators require enclosed shafts and machine rooms. The VIDO is engineered for efficiency.

- **Ultra-Compact Footprint:** Available in a 36" x 36" footprint, the VIDO is designed to fit into tight spaces, such as the center of a winding staircase. The small footprint makes it easy and ideal to install in any home.
- **Accessibility:** The option of a 36x48 footprint is the smallest elevator that will still allow wheelchair accessibility.
- **Machine Room-Less:** The cable-driven system is self-contained, meaning you don't need a separate room for machinery.
- **Retrofit Friendly:** Will fit under 96" ceiling (92" where permissible by state code)

3. Modern, "Open-Air" Aesthetic

Don't close off your room with a dark box. The VIDO is designed to be a centerpiece, not an eyesore.

- **Panoramic Visibility:** Standard clear acrylic walls allow light to pass through, keeping your home feeling open and airy.
- **Customizable Finishes:** Features powder-coated framing (shown here in Matte Black) with options for brushed or polished stainless steel fixtures to match your décor.
- **Ambient Lighting:** Includes integrated LED recessed ceiling lighting for a luxury feel.
- **Luxury Features Come Standard:** Automatic center parting gate, frameless clear landing.

4. Minimal Construction, Maximum Convenience

- **Pitless Design:** Unlike traditional elevators that require digging a deep pit in your foundation, the VIDO is designed as a pitless unit, protecting your floors and simplifying site preparation.
- **Minimize Install Disruption:** The packaging is reduced to fit through most doorways and hallways to allow for easy access to the final site of construction.
- **Faster Installation:** Our standardized component design reduces installation time from weeks to days, meaning less disruption to your daily life.
- **Standard Power:** Connects easily to a standard 120V power source.
- **Ease of Site Preparation:** No elevator shaft needed in this standalone elevator.

5. Luxury Features Come Standard

- **Ambient Lighting:** Includes integrated LED recessed ceiling lighting for a luxury feel.
- **Automatic center parting gate**
- **Frameless clear landing doors**

The VIDO's efficient hoistway design fits within a 36" square, maximizing interior cabin space while minimizing the structural footprint.

Safety & Reliability

Peace of mind is standard with every Artisan elevator.

- **Emergency Safety:** Equipped with automatic emergency battery lowering—if the power goes out, you won't get stuck.
- **Built-In Communication:** Includes an emergency-in-car phone system.
- **Easy Exit:** Doors locks can be manually released from inside the elevator.
- **Warranty:** Backed by a 10-year warranty on mechanical parts.

Technical Specifications at a Glance

- **Capacity:** 500 lbs.
- **Travel Speed:** 30 FPM (standard).
- **Drive System:** Winding Drum / Cable-Driven.
- **Cab Dimensions:** Approx. 25.75" wide X 28.8" deep (standard 36x36 model). Approx 25.75" wide x 38.75" deep (36x48 model)
